Health Outcomes Rank

Empty cells: Shaded = Item was not used to calculate rankings that year; White = Data unavailable. NR: Health outcomes (e.g., length of life) or health factors (e.g., health behaviors) were not ranked that year. n/a: State is not ranked against counties.

represents substantial changes in data sources or calculation of the measure that would affect comparisons with similar measures in prior years.

§ represents measures derived among Medicare enrollees.

Please refer to the [County Health Rankings & Roadmaps](#) to find out more about the indicator changes.

The annual *County Health Rankings* provide a snapshot of the health of Kansas counties. The *Rankings* are made up of two summary scores: **Health Factors** (which measure issues that can shape the health outcomes) and **Health Outcomes** (which measure length and quality of life). The following tables illustrate the “drivers,” or measures with the greatest impact on ranking position, for this county.

What do these drivers mean? The drivers indicate the five measures that, when combined with the weighting, have the greatest impact on the ranking positions for health factors and health outcomes. Drivers labeled with a green plus sign are the weighted measures that influenced higher, or better, rankings. Drivers labeled with a red minus sign indicate priority areas which, if improved, could have the greatest impact on improving the rankings of the county.

Health Factors: Drivers with greatest impact on ranking, Hodgeman County, KS – 2020

| | Measure | Description | Factor Category | County Value | State Value | Impact on Ranking |
|---|----------------------------|---|---------------------------------|--------------|-------------|-------------------|
| 1 | Adult smoking | % of adults who are current smokers | Health Behaviors | 14% | 17% | + |
| 2 | Primary care physicians | # of primary care physicians per 100,000 population | Clinical Care | 163 | 77 | + |
| 3 | Unemployment | % of population age 16 and older unemployed but seeking work | Social and Economic Environment | 2.5% | 3.4% | + |
| 4 | Children in poverty | % of children under age 18 in poverty | Social and Economic Environment | 13% | 15% | + |
| 5 | Preventable hospital stays | # of hospital stays for ambulatory care sensitive conditions per 100,000 Medicare enrollees | Clinical Care | 6783 | 4024 | - |

Health Outcomes: Drivers with greatest impact on ranking, Hodgeman County, KS – 2020

| | Measure | Description | Outcome Category | County Value | State Value | Impact on Ranking |
|---|---------------------------|--|------------------|--------------|-------------|-------------------|
| 1 | Poor physical health days | Average # of physically unhealthy days reported in past 30 days for adults | Quality of Life | 3.1 | 3.6 | + |
| 2 | Poor mental health days | Average # of mentally unhealthy days reported in past 30 days for adults | Quality of Life | 3.3 | 3.7 | + |
| 3 | Poor or fair health | % of adults reporting fair or poor health | Quality of Life | 14% | 16% | + |
| 4 | Low birthweight | % of live births with low birthweight (< 2,500 grams) | Quality of Life | 7% | 7.1% | - |
| 5 | Premature death | Years of potential life lost before age 75 per 100,000 population | Length of Life | | 7024 | NR |

NR: Measure (e.g., premature death) could not be reported for this county.

+ Green Plus: Measure with a positive impact on a county’s ranking position.

- Red Minus: Measure with a negative impact on a county’s ranking position.

Technical Note: The state values are only provided as a point of reference. They have not been used in the determination of county rankings or top drivers for health outcomes and health factors. For more information on the calculation of score and rankings, please visit: <http://bit.ly/CHRzscores>.
